Position Overview:

Site Manager - Photovoltaic (PV) Projects will be responsible for the on-site management and execution of PV projects. The ideal candidate will have extensive experience in managing construction sites, particularly in the photovoltaic industry, ensuring projects are completed safely, on time, and within budget.

Location: Romania (various sites across the country)

Reports To: Construction Manager

Company Description

ENEVO Group is a global engineering and automation venture that provides innovative solutions for Industrial Automation, Power Transmission and Distribution, Power Generation and Renewables. With business units in Automation & SCADA, Protection & Control Systems, Dispatch & Data Center, and Product Development, we embrace emerging technologies and are driven by research. Our team consists of young professionals with outstanding academic and career paths, who manage and add value to their respective units through active, problem-solving project work and international experience.

For the Renewables Business Unit, we are looking forward to welcoming in the team a new colleague, occupying the position of:

Site Manager

Key Responsibilities:

- **Site Management:**
 - Oversee all on-site activities, ensuring adherence to project plans, schedules, and specifications.
 - Coordinate and supervise subcontractors, suppliers, and site personnel.
 - Manage site logistics, including material deliveries, equipment mobilization, and workforce scheduling.
- **Health, Safety, and Environment (HSE):**
 - Implement and enforce safety protocols and procedures to ensure a safe working environment.
 - Conduct regular safety meetings, toolbox talks, and site inspections.
 - Ensure compliance with all relevant health, safety, and environmental regulations.
- **Quality Control:**
 - Monitor construction activities to ensure quality standards are met.
 - Conduct inspections and tests to verify compliance with design specifications and industry standards.
 - Address any quality issues promptly and implement corrective actions as needed.
- **Progress Monitoring:**
 - Track project progress and maintain accurate records of site activities.
 - Provide regular updates to the Project Manager and other stakeholders on project status.
 - Identify and address any delays or issues that may impact project timelines.
- **Stakeholder Coordination:**

GROUP

- Serve as the on-site point of contact for clients, consultants, and regulatory authorities.
- Facilitate communication between on-site personnel and off-site teams, including engineering and procurement.
- Assist in resolving any on-site disputes or issues that arise during construction.
- **Resource Management:**
 - Manage site resources efficiently, including labor, materials, and equipment.
 - Ensure optimal utilization of resources to maintain project schedules and budgets.
 - Monitor and control site expenses, including procurement of materials and services.
- **Documentation and Reporting:**
 - Maintain comprehensive site records, including daily logs, progress reports, and safety documentation.
 - Prepare and submit regular reports to the Project Manager, highlighting key activities and issues.
 - Ensure all project documentation is complete, accurate, and up-to-date.

Qualifications:

- Bachelor's degree in Construction Management, Electrical Engineering, Renewable Energy, or a related field.
- Minimum of 5 years of experience in site management, particularly in photovoltaic or renewable energy projects.
- Proven track record of successfully managing large-scale construction sites.
- Strong understanding of PV technology, construction practices, and safety regulations.
- Excellent leadership, communication, and organizational skills.
- Ability to read and interpret engineering drawings, plans, and specifications.
- Knowledge of relevant codes, standards, and regulations in the renewable energy sector.

How to Apply: Interested candidates are invited to submit their resume (and additional cover letter and references) to careers@enevogroup.ro with the subject line "Site Manager – PV Application"
