OIL & GAS

CYBERSECURITY

Position Overview:

Project Manager - Photovoltaic (PV) Projects will oversee the planning, execution, and completion of PV projects. The ideal candidate will have a strong background in project management, photovoltaic systems, and the EPC industry, with a proven track record of successfully managing large-scale solar projects.

Location: Bucharest

Reports To: Head of Project Management

Company Description

ENEVO Group is a global engineering and automation venture that provides innovative solutions for Industrial Automation, Power Transmission and Distribution, Power Generation and Renewables. With business units in Automation & SCADA, Protection & Control Systems, Dispatch & Data Center, and Product Development, we embrace emerging technologies and are driven by research. Our team consists of young professionals with outstanding academic and career paths, who manage and add value to their respective units through active, problem-solving project work and international experience.

For the Renewables Business Unit, we are looking forward to welcoming in the team a new colleague, occupying the position of:

Project Manager

Key Responsibilities:

- **Project Planning and Initiation:**
 - Develop comprehensive project plans, including scope, schedule, budget, and resource allocation.
 - Conduct feasibility studies and site assessments to determine project viability.
 - Coordinate with internal teams and external stakeholders to ensure project requirements are clearly defined and understood.
- **Project Execution:**
 - Lead and manage all phases of PV project implementation, from design and procurement to construction and commissioning.
 - Ensure projects are completed on time, within scope, and within budget.
 - Oversee procurement processes, including the selection of suppliers and subcontractors.
 - Coordinate with engineering teams to ensure design specifications are met and compliance with relevant codes and standards.
- **Stakeholder Management:**
 - Serve as the primary point of contact for clients, addressing their needs and concerns throughout the project lifecycle.
 - Facilitate communication between project stakeholders, including clients, contractors, regulatory agencies, and internal teams.

- Prepare and deliver regular project status reports and presentations to stakeholders.

- **Risk Management:**

- Identify potential project risks and develop mitigation strategies.
- Monitor and manage project risks and issues, ensuring timely resolution.
- Implement quality control measures to ensure project deliverables meet or exceed expectations.

- **Team Leadership:**

- Lead and mentor project team members, fostering a collaborative and high-performance work environment.
- Assign tasks and responsibilities, ensuring team members have the necessary resources and support to succeed.
- Conduct performance evaluations and provide feedback to team members.

- **Compliance and Safety:**

- Ensure all project activities comply with relevant health, safety, and environmental regulations.
- Promote a culture of safety and sustainability within the project team and among contractors.

Qualifications:

- Bachelor's degree in Electrical Engineering, Renewable Energy, Construction Management, or a related field. Advanced degree or PMP certification is a plus.
- Minimum of 5 years of experience in project management, specifically in photovoltaic systems.
- Proven experience managing large-scale PV projects from inception to completion.
- Strong understanding of PV technology and renewable energy principles.
- Excellent leadership, communication, and interpersonal skills.
- Ability to manage multiple projects simultaneously and prioritize tasks effectively.
- Proficiency in project management software (e.g., MS Project, Primavera) and other relevant tools.
- Knowledge of relevant codes, standards, and regulations in the renewable energy sector.

How to Apply: Interested candidates are invited to submit their resume (and additional cover letter and references) to careers@enevogroup.ro with the subject line "Project Manager – PV Application."
